Conversation: Comments on first review of Regional Waste Plan (North Wales)
Subject: Comments on first review of Regional Waste Plan (North Wales)

Denbighshire County Council (waste management section) believe the draft document represents a meaningful improvement on the original plan and clearly sets out the future requirements for waste management facilities in the region and contributes to the resolution of the site selection issue.

The likelihood of the Welsh Assembly introducing higher targets for municipal waste recycling and composting and limitations on use of energy from waste technologies should NOT alter the content of the draft document. The second review will be able to take these into account.

Regards,

Alan L Roberts
Uwch Swyddog Gwastraff/Senior Waste Officer
