

**OUR WASTE
OUR CHALLENGE**

Civic Amenity Sites?

Energy
from Waste?

Recycling?

Landfill?

What do
YOU think?

Waste is
one of the
biggest
environmental
concerns
facing Wales
today.

Wales currently relies on landfill (filling of old quarries and mines) for the disposal of waste but much of this is capable of being re-used, recycled, composted or treated to recover valuable materials and energy.

Space for landfill is shrinking fast. We need many alternative new waste facilities,..... and soon!

The Regional Waste Plan has been established to look at the options available; what facilities are needed, where they are needed and when they are needed.
